

HSE POLICY

Tosyali Algeria leader in the metallurgical industry, aware of the impact of its activities on the health, safety of its workers and the Environment has based its policy around 05 strategic axes:

- Minimizing health, safety risks and environmental impacts on site.
- Eliminating work accident risks and improving the life quality at work
- Protecting the environment and population from all kinds of pollution and nuisances.
- Control the consumption of natural and energy resources
- Master the system of health, safety at work and protection of the environment.

To achieve these objectives **Tosyali Algeria** is committed to:

- Promote the culture of risk prevention against work accidents and environmental impacts with the means, tools and planned actions: training, communication; selective sorting and recycling of waste.
- Comply with regulatory, normative and contractual requirements in force.
- Ensure safe and healthy working conditions for preservation against work-related trauma and pathologies.
- Preserve the environment by controlling the generation of waste, atmospheric emissions, consumption of different types of resources.
- Consult and involve workers and their representatives in decisions regarding occupational health and safety.

Tosyali Algeria also undertakes to communicate, respect and enforce this policy with continuous improvement of its Health, Safety at Work and Environment management system.
